Guava pruning and its physiology: The effect of time and level of pruning on growth, flowering and yield of guava (*Psidium guajava* L.) Shiva Adhikari

Flowering in Guava occurs at three distinct seasons namely spring, rainy and autumn. This experiment attempts to study the impacts of time and level of pruning on growth, flowering, leaf tissue analysis and yield of guava and find the best interaction to induce the plants to yield in winter season which is superior in quality with good market demand. Findings of the study reveals that time of pruning interacted significantly with level of pruning in respect to yield. Results help to conclude that to reduce rainy season crop and to give a good yield with high quality fruits in winter season, the plants are pruned in 20 cm pruning level not later than first week of May. As leaf tissue is concerned, study suggests that pruning time could not influence the NPK content of leaf significantly but level of pruning had marked effect on its content. This book helps to understand the tree management strategy to increase shoot numbers and induce off-season flowering and also give some insights on how pruning brings balance between vegetative and reproductive function of the plant.

From reader reviews:

Sylvia Dasilva:

Information is provisions for those to get better life, information currently can get by anyone with everywhere. The information can be a know-how or any news even a problem. What people must be consider if those information which is inside the former life are challenging be find than now's taking seriously which one is acceptable to believe or which one often the resource are convinced. If you have the unstable resource then you obtain it as your main information it will have huge disadvantage for you. All of those possibilities will not happen in you if you take Guava pruning and its physiology: The effect of time and level of pruning on growth, flowering and yield of guava (Psidium guajava L.) as the daily resource information.

Nathaniel Thomas:

Reading a book can be one of a lot of pastime that everyone in the world likes. Do you like reading book and so. There are a lot of reasons why people fantastic. First reading a e-book will give you a lot of new information. When you read a publication you will get new information simply because book is one of various ways to share the information or maybe their idea. Second, studying a book will make anyone more imaginative. When you looking at a book especially tale fantasy book the author will bring one to imagine the story how the characters do it anything. Third, you are able to share your knowledge to other folks. When you read this Guava pruning and its physiology: The effect of time and level of pruning on growth, flowering and yield of guava (Psidium guajava L.), you can tells your family, friends along with soon about yours reserve. Your knowledge can inspire others, make them reading a guide.

Kevin Roark:

The particular book Guava pruning and its physiology: The effect of time and level of pruning on growth, flowering and yield of guava (Psidium guajava L.) has a lot of knowledge on it. So when you read this book you can get a lot of advantage. The book was compiled by the very famous author. Tom makes some research prior to write this book. This kind of book very easy to read you can obtain the point easily after scanning this book.

Katherine Clark:

As we know that book is important thing to add our know-how for everything. By a publication we can know everything we want. A book is a set of written, printed, illustrated or even blank sheet. Every year has been exactly added. This book Guava pruning and its physiology: The effect of time and level of pruning on growth, flowering and yield of guava (Psidium guajava L.) was filled concerning science. Spend your free time to add your knowledge about your science competence. Some people has several feel when they reading a new book. If you know how big benefit from a book, you can experience enjoy to read a e-book. In the modern era like currently, many ways to get book that you just wanted.
