Comparing the Structure, Size, and Performance of Local and Mainstream Food Supply Chains: Economic Research Report Number 99 (Economic Research Reports) United States Department of Agriculture

A series of coordinated case studies compares the structure, size, and performance of local food supply chains with those of mainstream supply chains. Interviews and site visits with farms and businesses, supplemented with secondary data, describe how food moves from farms to consumers in 15 food supply chains. Key comparisons between supply chains include the degree of product differentiation, diversification of marketing outlets, and information conveyed to consumers about product origin. The cases highlight differences in prices and the distribution of revenues among supply chain participants, local retention of wages and proprietor income, transportation fuel use, and social capital creation.

Neil Nilsson:

As a student exactly feel bored for you to reading. If their teacher inquired them to go to the library or to make summary for some e-book, they are complained. Just minor students that has reading's spirit or real their leisure activity. They just do what the trainer want, like asked to go to the library. They go to generally there but nothing reading very seriously. Any students feel that studying is not important, boring along with can't see colorful pics on there. Yeah, it is to become complicated. Book is very important for you

personally. As we know that on this period, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore this Comparing the Structure, Size, and Performance of Local and Mainstream Food Supply Chains: Economic Research Report Number 99 (Economic Research Reports) can make you really feel more interested to read.
