Patrick Moore

Stargazing: Astronomy without a Telescope Patrick Moore

On a clear night, the vastness and beauty of the star-filled sky is awe inspiring. In *Stargazing: Astronomy without a Telescope* Patrick Moore, Britain's best known astronomer, tells you all you need to know about the universe visible to the naked eye. With the aid of charts and illustrations, he explains how to "read" the stars, to know which constellations lie overhead, their trajectory throughout the seasons, and the legends ascribed to them. In a month-by-month guide he describes using detailed star maps of the night skies of both the northern and southern hemispheres. He also takes a look at the planets, the Sun and the Moon and their eclipses, comets, meteors, as well as aurorae and other celestial phenomena--all in accessible scientific detail. This captivating book shows how, even with just the naked eye, astronomy can be a fascinating and rewarding hobby--for life.

Michael Nunn:

As a university student exactly feel bored in order to reading. If their teacher questioned them to go to the library or make summary for some publication, they are complained. Just minor students that has reading's spirit or real their leisure activity. They just do what the instructor want, like asked to the library. They go to there but nothing reading significantly. Any students feel that examining is not important, boring as well as can't see colorful pics on there. Yeah, it is to become complicated. Book is very important for you personally. As we know that on this age, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. So , this Stargazing: Astronomy without a Telescope can make you feel more interested to read.
