Large trade paperback; Manhatten, KS: Sunflower University Press, 2004. Numerous books and articles exist concerning the Korean Conflict, the air war, the foot soldiers, and the tank battles. But there is a dearth of information about how photographic intelligence and on-the-ground technical support turned the tide of war against the North Koreans and their Communist masters, and in favor of the Allies and those fighting to preserve and protect the liberties of the Korean people. This book fills a gap, by discussing in detail photographic reconnaissance and interpretation during 1950-52. No library on the Korean Conflict is complete without this important book. Highly recommended!
