Where To Watch Mammals In Britain And Ireland Richard Moores

Britain's mammals are relatively few in number, but include some notoriously hard-to-see, yet wonderfully charismatic species. There can be few people with even a passing interest in wildlife who would not want to see otters, red squirrels, bottle-nosed dolphins or Scottish wildcats. Even commoner species like the badger, roe deer and brown hare can be difficult to see without some specialist knowledge. This new guide provides sites and useful information to enable the reader to find and observe every British and Irish mammal species, including all marine mammals. Taking a species-by-species approach, the accounts give some background detail on the range, population and habits of the species, before providing a list of sites where that species can be seen. As broad a geographic spread as possible is given to maximise the chances of the reader finding a site local to them. The sites are mapped where appropriate, and the text is enlivened by a number of attractive line drawings. Introductory chapters cover general topics such as field-craft, equipment, and relevant legislation and good practice. This is an invaluable guide for anyone who wants to watch wild mammals in Britain and Ireland.
