Interactive Explorer: Oceans and Rain Forests

Jane Parker, Frances A. Dipper

Interactive Explorer: Oceans and Rain Forests Jane Parker, Frances A. Dipper

From sharks to starfish, parrots to poison dart frogs, our oceans and rain forests are home to millions of different plants and animals. In *Interactive Explorer: Oceans and Rain Forests*, kids can learn about these remarkable and often mysterious habitats and how to protect them. With lift-up acetate pages with dual layers, detailed cross-sections and diagrams, and interactive flaps, tabs, wheels, and windows, it's a complete hands-on experience.

Curious kids can lift a flap to discover how colorful coral reefs feed by catching tiny animals in their stinging tentacles, and how we can keep them alive but cutting down fewer trees far inland. Underneath an acetate layer, they'll see the rosy periwinkle, a rain forest flower whose medicine is used to treat serious illnesses, and find out how we can keep it safe and sound. They'll also pull tabs to see how elephants move logs, spin wheels to see the earth's land masses in different eras, and fold out a flower to find the praying mantis within.

James Ellis:

As a pupil exactly feel bored in order to reading. If their teacher questioned them to go to the library or make summary for some reserve, they are complained. Just minor students that has reading's heart and soul or real their hobby. They just do what the instructor want, like asked to the library. They go to there but nothing reading significantly. Any students feel that examining is not important, boring and also can't see colorful images on there. Yeah, it is being complicated. Book is very important for you. As we know that on this age, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. So , this Interactive Explorer: Oceans and Rain Forests can make you sense more interested to read.
