This is a NAVAL POSTGRADUATE SCHOOL MONTEREY CA report procured by the Pentagon and made available for public release. It has been reproduced in the best form available to the Pentagon. It is not spiral-bound, but rather assembled with Velobinding in a soft, white linen cover. The Storming Media report number is A923114. The abstract provided by the Pentagon follows: Mines are relatively cheap weapons that can be employed in significant quantity by any country with even a modest military budget, and can be very effective at severely damaging or sinking ships or denying maritime access to an area. In this thesis, simulation and analytical models are formulated and studied to investigate the benefits and risks of mine avoidance, without object classification capability, under circumstances that include imperfect sensors and false targets. Two models of mine avoidance maneuvering are formulated, with increasing complexity in both their analytical and simulation implementations. With both formulations, results are obtained and analyzed to produce tables showing the probability of successful minefield transit as a function of sensor probability of detection vs. density of mine and no-mine, mine-like bottom objects, and the false alarm rate. The tables show the range of those parameter values for which mine avoidance maneuvering improves the probability of safe transit, and the values for which mine avoidance maneuvering reduces the probability of safe transit. The decrease is attributable to the fact that mine avoidance maneuvering increases the distance traveled in the minefield and the consequent risk of damage or destruction by an undetected mine. Quantitative results for the increased distance traveled in the minefield are also presented.

#### **From reader reviews:**

##### **Jose Anderson:**

What do you concentrate on book? It is just for students because they are still students or that for all people in the world, the actual best subject for that? Just you can be answered for that question above. Every person has different personality and hobby for every single other. Don't to be pushed someone or something that they don't would like do that. You must know how great along with important the book The Effect of Sensor Performance on Safe Minefield Transit. All type of book could you see on many solutions. You can look for the internet methods or other social media.

##### **Larry Chaffin:**

As people who live in the particular modest era should be upgrade about what going on or info even knowledge to make these keep up with the era that is certainly always change and make progress. Some of you maybe will probably update themselves by reading through books. It is a good choice for you but the problems coming to an individual is you don't know which one you should start with. This The Effect of Sensor Performance on Safe Minefield Transit is our recommendation to cause you to keep up with the world. Why, since this book serves what you want and want in this era.

##### **William Fields:**

This The Effect of Sensor Performance on Safe Minefield Transit tend to be reliable for you who want to become a successful person, why. The reason why of this The Effect of Sensor Performance on Safe Minefield Transit can be on the list of great books you must have is definitely giving you more than just simple looking at food but feed you actually with information that probably will shock your previous knowledge. This book will be handy, you can bring it everywhere you go and whenever your conditions in the e-book and printed versions. Beside that this The Effect of Sensor Performance on Safe Minefield Transit giving you an enormous of experience for instance rich vocabulary, giving you trial run of critical thinking that we realize it useful in your day action. So , let's have it and luxuriate in reading.

##### **Amy Smith:**

In this particular era which is the greater man or who has ability to do something more are more valuable than other. Do you want to become one among it? It is just simple strategy to have that. What you need to do is just spending your time very little but quite enough to possess a look at some books. One of the books in the top record in your reading list is The Effect of Sensor Performance on Safe Minefield Transit. This book and that is qualified as The Hungry Slopes can get you closer in becoming precious person. By looking upwards and review this publication you can get many advantages.
