Prometheanism: Technology, Digital Culture and Human Obsolescence (Critical Perspectives on Theory, Culture and Politics) Christopher John Müller

Günther Anders's prolific philosophy of technology is undergoing a major revival but has never been translated into English. *Prometheanism* mobilises Anders's pragmatic thought and current trends in critical theory to rethink the constellations of power that are configuring themselves around our increasingly "smart" machines.

The book offers a comprehensive introduction to Anders's philosophy of technology with an annotated translation of his visionary essay 'On Promethean Shame', part of *The Obsolescence of Human Beings I* published in 1956. The essay analyses feelings of curtailment, obsolescence and solitude that become manifest whilst we interact with machines. When technological solutions begin to make humans look embarrassingly limited and flawed, new emotional vulnerabilities are exposed. These need to be thought, because our wavering confidence leaves us unprotected in an ever more (un)transparent, connected yet fractured world.
