Almost Free Modules, Volume 65: Set-theoretic Methods (North-Holland Mathematical Library) P.C. Eklof, A.H. Mekler

This book provides a comprehensive exposition of the use of set-theoretic methods in abelian group theory, module theory, and homological algebra, including applications to Whitehead's Problem, the structure of Ext and the existence of almost-free modules over non-perfect rings. This second edition is completely revised and udated to include major developments in the decade since the first edition. Among these are applications to cotorsion theories and covers, including a proof of the Flat Cover Conjecture, as well as the use of Shelah's pcf theory to constuct almost free groups. As with the first edition, the book is largely self-contained, and designed to be accessible to both graduate students and researchers in both algebra and logic. They will find there an introduction to powerful techniques which they may find useful in their own work.

From reader reviews:

Roger Cooper:

The book Almost Free Modules, Volume 65: Set-theoretic Methods (North-Holland Mathematical Library) will bring you to the new experience of reading any book. The author style to spell out the idea is very unique. Should you try to find new book to learn, this book very suitable to you. The book Almost Free Modules, Volume 65: Set-theoretic Methods (North-Holland Mathematical Library) is much recommended to you to learn. You can also get the e-book from the official web site, so you can more readily to read the book.

Claudia Weidner:

Reading a guide tends to be new life style in this particular era globalization. With reading you can get a lot of information which will give you benefit in your life. Along with book everyone in this world can easily share their idea. Guides can also inspire a lot of people. A lot of author can inspire all their reader with their story as well as their experience. Not only the story that share in the ebooks. But also they write about the ability about something that you need case in point. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that exist now. The authors on earth always try to improve their talent in writing, they also doing some research before they write to their book. One of them is this Almost Free Modules, Volume 65: Set-theoretic Methods (North-Holland Mathematical Library).

Michael Kruger:

Are you kind of occupied person, only have 10 or 15 minute in your time to upgrading your mind proficiency or thinking skill also analytical thinking? Then you are receiving problem with the book when compared with can satisfy your short space of time to read it because all of this time you only find publication that need more time to be study. Almost Free Modules, Volume 65: Set-theoretic Methods (North-Holland Mathematical Library) can be your answer mainly because it can be read by a person who have those short extra time problems.

Rena Campbell:

Don't be worry if you are afraid that this book will certainly filled the space in your house, you can have it in e-book way, more simple and reachable. This specific Almost Free Modules, Volume 65: Set-theoretic Methods (North-Holland Mathematical Library) can give you a lot of buddies because by you taking a look at this one book you have issue that they don't and make you actually more like an interesting person. This book can be one of one step for you to get success. This book offer you information that perhaps your friend doesn't know, by knowing more than additional make you to be great folks. So , why hesitate? Let me have Almost Free Modules, Volume 65: Set-theoretic Methods (North-Holland Mathematical Library).
