Clinical Chemistry: Laboratory Management and Clinical Correlations

Kent B. Lewandrowski MD

Clinical Chemistry: Laboratory Management and Clinical Correlations Kent B. Lewandrowski MD

A modern text that combines the fundamentals of methodology with key elements of interpretation, this book blends business and management issues, analytical principles, and clinical material for practicing pathologists, residents, fellows, and laboratorians. The text is organized into three major sections: laboratory management, instrumentation and methods, and analysis and clinical correlation. The first section addresses issues essential for running a profitable laboratory; modern techniques and instrumentation are examined in the second section; and the analysis and clinical correlation section provides the reader with numerous diagnostic algorithms that illustrate common work-ups and problems. In addition, case studies selectively illuminate specific clinical issues.
