H2O: Water Package Design

H2O: Water Package Design

This book is a collection of some of the best-designed labels for bottled water. Our selection of designs is based on the aesthetic qualities of both the label and the container.

We have arranged the designs by country, because in our opinion, this is an excellent way to determine styles and tendencies on a world level. Additional data are filtered under this first decision to contextualize the water. These include the water's source, the bottling method used, the composition of the water, and any other piece of information that helps us better understand the design, its historical context and its contemporary influences.
