Marine Mycology: The Higher Fungi Jan Kohlmeyer, Erika Kohlmeyer

Marine Mycology: The Higher Fungi deals with the higher marine fungi, i.e., Ascomycotina, Basidiomycotina, and Deuteromycotina. This book combines features of a monograph with those of a text. It includes sections on ecological groups of fungi and other topics, such as phylogeny, ontogeny, physiology, and vertical and geographical distribution, providing information on known facts and open questions. The taxonomic-descriptive part contains complete descriptions of each genus and species, together with substrates, range, etymology of generic and specific names, and literature. There are keys for all species within a given genus, and a general illustrated key leads to the individual species. The taxonomic section is based on examinations of almost all of the filamentous marine fungi, and unpublished data on new hosts and geographical distributions are included for many species. The filamentous higher marine fungi are represented by 149 Ascomycetes, 4 Basidiomycetes, and 56 Deuteromycetes. The majority, namely 191 (91%) of the filamentous fungi, are obligately marine species, whereas the remainder are facultatively marine. One new species and seven new combinations are proposed. The yeasts are treated in a separate chapter and comprise 177 species or varieties.

Jimmy Stansberry:

Spent a free time and energy to be fun activity to complete! A lot of people spent their down time with their family, or their own friends. Usually they doing activity like watching television, going to beach, or picnic from the park. They actually doing same thing every week. Do you feel it? Will you something different to fill your current free time/ holiday? Might be reading a book may be option to fill your free time/ holiday. The first thing you will ask may be what kinds of book that you should read. If you want to test look for book, may be the reserve untitled Marine Mycology: The Higher Fungi can be good book to read. May be it may be best activity to you.

Barbara Morton:

A lot of people always spent their own free time to vacation as well as go to the outside with them family or their friend. Do you know? Many a lot of people spent these people free time just watching TV, or perhaps playing video games all day long. If you need to try to find a new activity honestly, that is look different you can read a book. It is really fun for you. If you enjoy the book which you read you can spent all day every day to reading a guide. The book Marine Mycology: The Higher Fungi it is quite good to read. There are a lot of folks that recommended this book. We were holding enjoying reading this book. If you did not have enough space to create this book you can buy the e-book. You can m0ore very easily to read this book out of your smart phone. The price is not very costly but this book possesses high quality.

Mark Authement:

As a pupil exactly feel bored to be able to reading. If their teacher questioned them to go to the library as well as to make summary for some book, they are complained. Just little students that has reading's heart and soul or real their passion. They just do what the educator want, like asked to go to the library. They go to right now there but nothing reading seriously. Any students feel that studying is not important, boring and can't see colorful images on there. Yeah, it is for being complicated. Book is very important to suit your needs. As we know that on this era, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. So , this Marine Mycology: The Higher Fungi can make you truly feel more

interested to read.
