Set Theoretical Logic-The Algebra of Models (Lectures on Mathematical Logic)

W Felscher

Set Theoretical Logic-The Algebra of Models (Lectures on Mathematical Logic) W Felscher

This is an introduction to mathematical logic in which all the usual topics are presented: compactness and axiomatizability of semantical consequence, Löwenheim-Skolem-Tarski theorems, prenex and other normal forms, and characterizations of elementary classes with the help of ultraproducts. Logic is based exclusively on semantics: truth and satisfiability of formulas in structures are the basic notions. The methods are algebraic in the sense that notions such as homomorphisms and congruence relations are applied throughout in order to gain new insights. These concepts are developed and can be viewed as a first course on universal algebra. The approach to algorithms generating semantical consequences is algebraic as well: for equations in algebras, for propositional formulas, for open formulas of predicate logic, and for the formulas of quantifier logic. The structural description of logical consequence is a straightforward extension of that of equational consequence, as long as Boolean valued propositions and Boolean valued structures are considered; the reduction of the classical 2-valued case then depends on the Boolean prime ideal theorem.

From reader reviews:

Eva Velasco:

Do you one among people who can't read satisfying if the sentence chained inside the straightway, hold on guys this aren't like that. This Set Theoretical Logic-The Algebra of Models (Lectures on Mathematical Logic) book is readable by means of you who hate the straight word style. You will find the information here are arrange for enjoyable reading experience without leaving also decrease the knowledge that want to offer to you. The writer regarding Set Theoretical Logic-The Algebra of Models (Lectures on Mathematical Logic) content conveys objective easily to understand by lots of people. The printed and e-book are not different in the written content but it just different in the form of it. So , do you even now thinking Set Theoretical Logic-The Algebra of Models (Lectures on Mathematical Logic) is not loveable to be your top checklist reading book?

Linda Monge:

Typically the book Set Theoretical Logic-The Algebra of Models (Lectures on Mathematical Logic) will bring someone to the new experience of reading any book. The author style to explain the idea is very unique. In case you try to find new book to read, this book very suited to you. The book Set Theoretical Logic-The Algebra of Models (Lectures on Mathematical Logic) is much recommended to you to study. You can also get the e-book from the official web site, so you can quicker to read the book.

Jessie Henricks:

The reserve untitled Set Theoretical Logic-The Algebra of Models (Lectures on Mathematical Logic) is the publication that recommended to you you just read. You can see the quality of the publication content that will be shown to a person. The language that writer use to explained their way of doing something is easily to understand. The author was did a lot of investigation when write the book, so the information that they share for your requirements is absolutely accurate. You also will get the e-book of Set Theoretical Logic-The Algebra of Models (Lectures on Mathematical Logic) from the publisher to make you far more enjoy free time.

Melinda McKinney:

Can you one of the book lovers? If so, do you ever feeling doubt if you find yourself in the book store? Attempt to pick one book that you find out the inside because don't determine book by its handle may doesn't work here is difficult job because you are scared that the inside maybe not seeing that fantastic as in the outside search likes. Maybe you answer can be Set Theoretical Logic-The Algebra of Models (Lectures on Mathematical Logic) why because the great cover that make you consider about the content will not disappoint an individual. The inside or content will be fantastic as the outside or maybe cover. Your reading 6th sense will directly assist you to pick up this book.
