Introduction to Biometrics Anil Jain, Arun A. Ross, Karthik Nandakumar

Biometric recognition, or simply biometrics, is the science of establishing the identity of a person based on physical or behavioral attributes. It is a rapidly evolving field with applications ranging from securely accessing one's computer to gaining entry into a country. While the deployment of large-scale biometric systems in both commercial and government applications has increased the public awareness of this technology, "Introduction to Biometrics" is the first textbook to introduce the fundamentals of Biometrics to undergraduate/graduate students. The three commonly used modalities in the biometrics field, namely, fingerprint, face, and iris are covered in detail in this book. Few other modalities like hand geometry, ear, and gait are also discussed briefly along with advanced topics such as multibiometric systems and security of biometric systems. Exercises for each chapter will be available on the book website to help students gain a better understanding of the topics and obtain practical experience in designing computer programs for biometric applications. These can be found at: <http://www.csee.wvu.edu/~ross/BiometricsTextBook/>.

Designed for undergraduate and graduate students in computer science and electrical engineering, "Introduction to Biometrics" is also suitable for researchers and biometric and computer security professionals.

Beside that this Introduction to Biometrics forcing you to have an enormous of experience like rich vocabulary, giving you trial of critical thinking that we understand it useful in your day pastime. So , let's have it appreciate reading.

Sophia Morrison:

Don't be worry in case you are afraid that this book will probably filled the space in your house, you could have it in e-book technique, more simple and reachable. That Introduction to Biometrics can give you a lot of buddies because by you taking a look at this one book you have thing that they don't and make you more like an interesting person. This kind of book can be one of one step for you to get success. This book offer you information that perhaps your friend doesn't know, by knowing more than various other make you to be great persons. So , why hesitate? Let's have Introduction to Biometrics.

Joyce Tower:

As a pupil exactly feel bored to reading. If their teacher expected them to go to the library or even make summary for some e-book, they are complained. Just very little students that has reading's internal or real their leisure activity. They just do what the trainer want, like asked to go to the library. They go to right now there but nothing reading very seriously. Any students feel that studying is not important, boring and also can't see colorful pics on there. Yeah, it is to get complicated. Book is very important for you personally. As we know that on this period, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. So , this Introduction to Biometrics can make you truly feel more interested to read.
