Quiver Trees, Phantom Orchids and Rock Splitters: The Remarkable Survival Strategies of Plants

Jesse Vernon Trail

A fascinating exploration of the world's most unusual plants

Whether it's an arctic heather that can create subtropical conditions within its leaves or a dwarf mistletoe that can shoot its seeds up to 50 feet away, plants demonstrate remarkable strategies in coping with and surviving their environment. They are often exposed to bitter cold, relentless winds, intense heat, drought, fire, pollution, and many other adverse growing conditions. Yet they are still able to survive and often even thrive.

Quiver Trees, Phantom Orchids and Rock Splitters: The Remarkable Survival Strategies of Plants showcases these exceptional plants with absorbing information and stunning photos that will inspire a new respect for nature's innovation and resilience.
