Puppetry in Dementia Care: Connecting through Creativity and Joy Karrie Marshall

Even in the later stages of the disease, when memory, words and relationships are affected, it is possible for people with dementia to express emotions, imagination, humour, sensitivities and personal preferences. This book demonstrates the many ways in which puppetry and associated art forms such as singing and story-telling can be used in a person-centred way to create opportunities for these human responses to emerge.

The author describes different scenarios in which puppetry can help facilitate connections, including in response to changes in relationships, communicating when words fail and in times of distress or conflict. She explains how puppets can be used to stimulate memories, celebrate life achievements and promote self-esteem and confidence, as well as with those nearing the end of life as part of palliative care. Strategies for introducing puppetry and other forms of creative stimulation into daily care are suggested, and real examples are used to illustrate how creativity may benefit the person with dementia beyond the immediate session. Step-by-step instructions for making a variety of puppets are also included.

This thought-provoking book will be a source of inspiration and practical ideas for care staff and activity coordinators, creative arts therapists, occupational therapists, puppeteers and other artists working in care settings, as well as relatives of people with dementia looking for new ways to connect with their loved ones.
