Kendall Atkinson, Weimin Han

Theoretical Numerical Analysis: A Functional Analysis Framework: 39 (Texts in Applied Mathematics) Kendall Atkinson, Weimin Han

This textbook prepares graduate students for research in numerical analysis/computational mathematics by giving to them a mathematical framework embedded in functional analysis and focused on numerical analysis. This helps the student to move rapidly into a research program. The text covers basic results of functional analysis, approximation theory, Fourier analysis and wavelets, iteration methods for nonlinear equations, finite difference methods, Sobolev spaces and weak formulations of boundary value problems, finite element methods, elliptic variational inequalities and their numerical solution, numerical methods for solving integral equations of the second kind, and boundary integral equations for planar regions. The presentation of each topic is meant to be an introduction with certain degree of depth. Comprehensive references on a particular topic are listed at the end of each chapter for further reading and study.

Because of the relevance in solving real world problems, multivariable polynomials are playing an ever more important role in research and applications. In this third edition, a new chapter on this topic has been included and some major changes are made on two chapters from the previous edition. In addition, there are numerous minor changes throughout the entire text and new exercises are added.

Review of earlier edition:

"...the book is clearly written, quite pleasant to read, and contains a lot of important material; and the authors have done an excellent job at balancing theoretical developments, interesting examples and exercises, numerical experiments, and bibliographical references."

R. Glowinski, SIAM Review, 2003

From reader reviews:

George Marsh:

The guide untitled Theoretical Numerical Analysis: A Functional Analysis Framework: 39 (Texts in Applied Mathematics) is the book that recommended to you to read. You can see the quality of the reserve content that will be shown to you. The language that writer use to explained their ideas are easily to understand. The author was did a lot of analysis when write the book, therefore the information that they share to you personally is absolutely accurate. You also can get the e-book of Theoretical Numerical Analysis: A Functional Analysis Framework: 39 (Texts in Applied Mathematics) from the publisher to make you far more enjoy free time.

Jane Abraham:

The book with title Theoretical Numerical Analysis: A Functional Analysis Framework: 39 (Texts in Applied Mathematics) possesses a lot of information that you can learn it. You can get a lot of advantage after read this book. This kind of book exist new know-how the information that exist in this publication represented the condition of the world right now. That is important to yo7u to be aware of how the improvement of the world. That book will bring you throughout new era of the the positive effect. You can read the e-book on your own smart phone, so you can read the idea anywhere you want.

Janice Pyles:

A lot of people always spent their particular free time to vacation or even go to the outside with them family members or their friend. Did you know? Many a lot of people spent that they free time just watching TV, or maybe playing video games all day long. If you want to try to find a new activity here is look different you can read a book. It is really fun for yourself. If you enjoy the book you read you can spent all day every day to reading a publication. The book Theoretical Numerical Analysis: A Functional Analysis Framework: 39 (Texts in Applied Mathematics) it is rather good to read. There are a lot of people who recommended this book. We were holding enjoying reading this book. If you did not have enough space to deliver this book you can buy the e-book. You can m0ore easily to read this book out of your smart phone. The price is not to fund but this book possesses high quality.

James Fitzpatrick:

A lot of book has printed but it is different. You can get it by web on social media. You can choose the best book for you, science, comedian, novel, or whatever simply by searching from it. It is referred to as of book Theoretical Numerical Analysis: A Functional Analysis Framework: 39 (Texts in Applied Mathematics). Contain your knowledge by it. Without leaving behind the printed book, it could add your knowledge and make a person happier to read. It is most important that, you must aware about reserve. It can bring you from one destination for a other place.
