Computer System and Network Security (Computer Science & Engineering) Gregory B. White, Eric A. Fisch, Udo W. Pooch

Computer System and Network Security provides the reader with a basic understanding of the issues involved in the security of computer systems and networks. Introductory in nature, this important new book covers all aspects related to the growing field of computer security. Such complete coverage in a single text has previously been unavailable, and college professors and students, as well as professionals responsible for system security, will find this unique book a valuable source of information, either as a textbook or as a general reference.

Computer System and Network Security discusses existing and potential threats to computer systems and networks and outlines the basic actions that are generally taken to protect them. The first two chapters of the text introduce the reader to the field of computer security, covering fundamental issues and objectives. The next several chapters describe security models, authentication issues, access control, intrusion detection, and damage control. Later chapters address network and database security and systems/networks connected to wide-area networks and internetworks. Other topics include firewalls, cryptography, malicious software, and security standards. The book includes case studies with information about incidents involving computer security, illustrating the problems and potential damage that can be caused when security fails.

This unique reference/textbook covers all aspects of computer and network security, filling an obvious gap in the existing literature.

From reader reviews:

Michael Berube:

The book Computer System and Network Security (Computer Science & Engineering) gives you the sense of being enjoy for your spare time. You should use to make your capable considerably more increase. Book can being your best friend when you getting strain or having big problem with the subject. If you can make examining a book Computer System and Network Security (Computer Science & Engineering) to get your habit, you can get far more advantages, like add your own capable, increase your knowledge about a number of or all subjects. You may know everything if you like wide open and read a reserve Computer System and Network Security (Computer Science & Engineering). Kinds of book are a lot of. It means that, science publication or encyclopedia or some others. So , how do you think about this book?

Cora Snyder:

Book is to be different for each and every grade. Book for children until finally adult are different content. As we know that book is very important for us. The book Computer System and Network Security (Computer Science & Engineering) was making you to know about other knowledge and of course you can take more information. It is extremely advantages for you. The publication Computer System and Network Security (Computer Science & Engineering) is not only giving you considerably more new information but also to get your friend when you truly feel bored. You can spend your own personal spend time to read your guide. Try to make relationship with the book Computer System and Network Security (Computer Science & Engineering). You never sense lose out for everything when you read some books.

Hector Duggan:

This Computer System and Network Security (Computer Science & Engineering) tend to be reliable for you who want to certainly be a successful person, why. The explanation of this Computer System and Network Security (Computer Science & Engineering) can be on the list of great books you must have is usually giving you more than just simple examining food but feed you actually with information that maybe will shock your preceding knowledge. This book is actually handy, you can bring it just about everywhere and whenever your conditions throughout the e-book and printed versions. Beside that this Computer System and Network Security (Computer Science & Engineering) forcing you to have an enormous of experience for instance rich vocabulary, giving you tryout of critical thinking that we all know it useful in your day action. So , let's have it and revel in reading.

George Tucker:

In this era globalization it is important to someone to find information. The information will make professionals understand the condition of the world. The healthiness of the world makes the information simpler to share. You can find a lot of sources to get information example: internet, paper, book, and soon. You can view that now, a lot of publisher which print many kinds of book. The actual book that

recommended to your account is Computer System and Network Security (Computer Science & Engineering) this publication consist a lot of the information with the condition of this world now. This particular book was represented how can the world has grown up. The vocabulary styles that writer value to explain it is easy to understand. Often the writer made some investigation when he makes this book. That's why this book acceptable all of you.
