Green's Function Estimates for Lattice Schrödinger Operators and Applications. (AM-158) (Annals of Mathematics Studies) Jean Bourgain

This book presents an overview of recent developments in the area of localization for quasi-periodic lattice Schrödinger operators and the theory of quasi-periodicity in Hamiltonian evolution equations. The physical motivation of these models extends back to the works of Rudolph Peierls and Douglas R. Hofstadter, and the models themselves have been a focus of mathematical research for two decades. Jean Bourgain here sets forth the results and techniques that have been discovered in the last few years. He puts special emphasis on so-called "non-perturbative" methods and the important role of subharmonic function theory and semi-algebraic set methods. He describes various applications to the theory of differential equations and dynamical systems, in particular to the quantum kicked rotor and KAM theory for nonlinear Hamiltonian evolution equations.

Intended primarily for graduate students and researchers in the general area of dynamical systems and mathematical physics, the book provides a coherent account of a large body of work that is presently scattered in the literature. It does so in a refreshingly contained manner that seeks to convey the present technological "state of the art."

From reader reviews:

Barbara Cook:

Hey guys, do you desire to find a new book to read? Maybe the book with the name Green's Function Estimates for Lattice Schrödinger Operators and Applications. (AM-158) (Annals of Mathematics Studies) suitable to you? The actual book was written by a well-known writer in this era. Typically the book titled Green's Function Estimates for Lattice Schrödinger Operators and Applications. (AM-158) (Annals of Mathematics Studies) is one of several books everyone reads now. This specific book was inspired by many men and women in the world. When you read this e-book you will enter the new dimensions that you have never known prior to. The author explained their strategy in a simple way, therefore all people can easily be aware of the core of this reserve. This book will give you a great deal of information about this world now. To help you to see the representation of the world within this book.

Erin Marshall:

Reading a book can be one of a lot of tasks that everyone in the world enjoys. Do you like reading books and so. There are a lot of reasons why people love it. First, reading a reserve will give you a lot of new information. When you read a book you will get new information since a book is one of many ways to share the information or perhaps their idea. Second, examining a book will make anyone more imaginative. When you are looking at a book especially a tale fantasy book the author will bring you to imagine the story how the character types do anything. Third, you are able to share your knowledge with other folks. When you read this Green's Function Estimates for Lattice Schrödinger Operators and Applications. (AM-158) (Annals of Mathematics Studies), you can tell your family, friends and soon about your publication. Your knowledge can inspire the mediocre, make them read a publication.

Bonnie Daves:

Precisely why? Because this Green's Function Estimates for Lattice Schrödinger Operators and Applications. (AM-158) (Annals of Mathematics Studies) is an extraordinary book that the inside of the e-book is waiting for you to snap this but later it will jolt you with the secret the item inside. Reading this book adjacent to it was a fantastic author who else wrote the book in such an amazing way makes the content interior easier to understand, an entertaining approach but still conveys the meaning completely. So, it is good for you for not hesitating having this nowadays or you going to regret it. This phenomenal book will give you a lot of positive aspects than the other books possess such as help improving your expertise and your critical thinking way. So, still want to hesitate having that book? If I had been you I will go to the reserve store hurriedly.

Hermelinda Anthony:

Do you have something that you want such as a book? Book lovers usually prefer to opt for books like comic, short stories and the biggest you are novel. Now, why not attempt Green's Function Estimates for Lattice Schrödinger Operators and Applications. (AM-158) (Annals of Mathematics Studies) that give you

pleasure preference will be satisfied by reading this book. Reading behavior all over the world can be said as the means for people to know world considerably better than how they react towards the world. It can't be claimed constantly that reading practice only for the geeky individual but for all of you who wants to always be success person. So , for all you who want to start reading as your good habit, you may pick Green's Function Estimates for Lattice Schrödinger Operators and Applications. (AM-158) (Annals of Mathematics Studies) become your own starter.
